A Stunning New Video of the 5 Coolest Tricks Siri Can Do New is always better when it comes to technology, and the new additions to Apple's family are no exception. Watch the new video below to see what Siri can do! Apple introduced an updated version of their Siri assistant at WWDC 2015. The iDevice powerhouse redesigned its platform to be able to handle multiple languages, easily select third-party apps, and do the everyday stuff that Siri can already do. But the biggest

change is the addition of new features that will make Siri a better assistant than ever. New features, such as the ability to track daily habits and habits for an entire month, or to tell you what time the next flight is leaving are all very handy additions, but did you know that Siri can actually do more than you think? Look no further than the video above to see what the new Siri can do! What do you think of all the new features? Let us know your thoughts in the comment section.oper

March 2017 Tuesday, March 14th, 2017 A wonderful time was had by all at the Boston Maritime Museum's first-ever Wind and Water Show this past Saturday and Sunday. This photo is from day two of the event. We were thrilled with the crowd turnout and the weather was a great companion to the event. The Museum's wind and water

ship simulator was a big hit, and the museum's first-ever fountain was impressive to watch as well.Q: Can partial ordinals be presented in cyclic permutations? If $(\alpha_i)_{i\in I}$ is a presentation of the partial ordinals, then it will be easy to prove that $\alpha_i\leq\max\{\alpha_i\mid i\in I\}$ for any $i\in I$. My question concerns presentations like the following: $\alpha:=\{i\in \omega\mid \aleph(i)=\omega\}$ Does this satisfy the above statement? Is there a reason why this is not possible? A: First, ω is a partial order with respect to the

usual ordering relation. That is: $$i
